[XA],[EF],[EH],[EB],[Ei]

## SH-4060(K)

[DX],[EG],[DM],[EK],[EW]  
[XA],[EF],[EH],[EB],[Ei]

- \* The cabinet and front panel are available in black color and silver types.
- \* The black type model is provided with (K) in the Service Manual.

- Areas**
- \* [DX] is available in Scandinavia.
  - \* [EG] is available in F.R. Germany.
  - \* [DM] is available in Denmark.
  - \* [EK] is available in United Kingdom.
  - \* [EW] is available in Switzerland.
  - \* [EF] is available in France.
  - \* [XA] is available in Southeast Asia, Oceania, Africa, Middle Near East and Central South America.
  - \* [EH] is available in Holland.
  - \* [EB] is available in Belgium.
  - \* [Ei] is available in Italy.

### Specifications

(Specifications are subject to change without notice for further improvement.)

### FEATURES

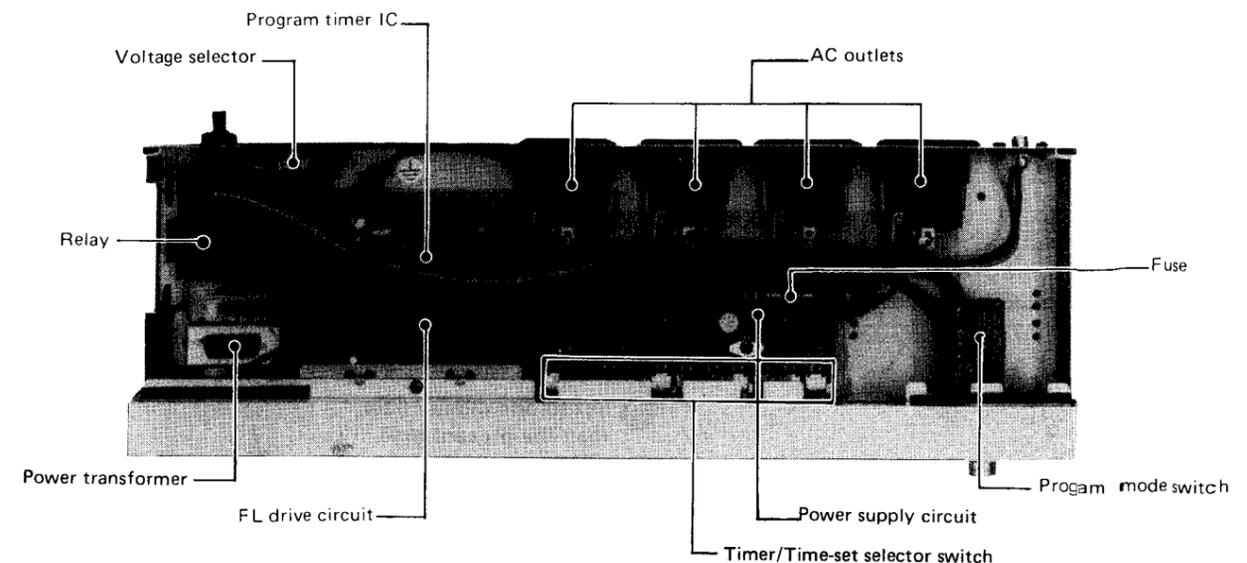

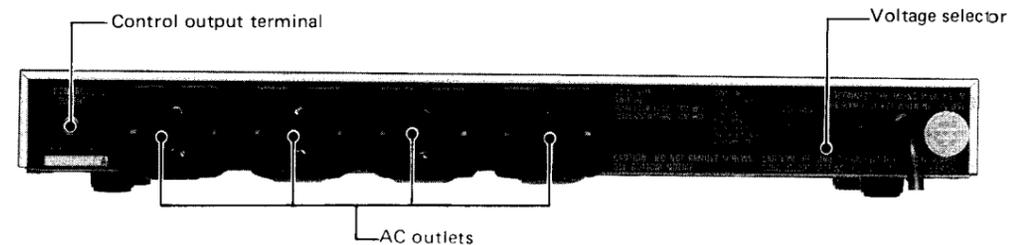

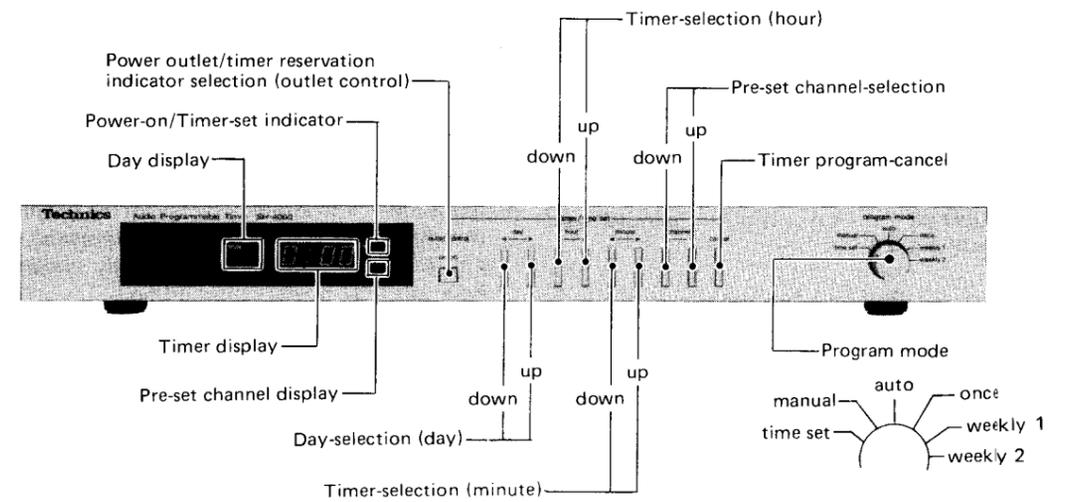

- Program function design capable of one-week reservation (Timer ON-OFF setting in 11 modes)
  - \* Specified day of Monday ~ Sunday.
  - \* Everyday of Monday ~ Sunday.
  - \* Everyday except Sunday.

- \* Everyday except Saturday, Sunday.
- \* Only Saturday, Sunday.

- With the Technics quartz synthesizer tuner (ST-S8(K), S6, S4, Z45) connected, the program can be controlled by the channel setting buttons.
- Once function for special programs.

## SH-4060

### LOCATION OF CONTROLS

\* This photo shows the [EG] area.  
The shape of AC outlet of this unit differs with area.

## HOW TO OPERATE

### Before making the timer settings

#### 1. What timer operation means

This unit can be set to turn the power on and off to connected equipment, either once only or every week at the same day and time.

#### 2. The present day and time must first be correctly set.

This unit must first be set for the correct present day and time, because subsequent timer settings are based upon the unit operating at the correct day and time.

#### 3. About the use of the "day", "hour", "minute" and "channel" buttons.

##### Note:

When the mode selector is set to the "manual" position or the "auto" position, these buttons cannot be used as described below.

##### 1) When the button marked "►" is pressed:

- The day display will change in the order MON, TUE, ...

Note, however, that if the mode selector is set to the "weekly 1" position or the "weekly 2" position, the display will change in the following order after SUN:

- The hour, minute and channel displays will change in the order from small number to large number.

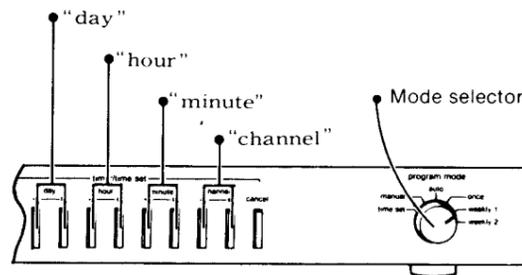

##### 2) When the button marked "◀" is pressed:

All displays change in the order opposite to that described in 1).

##### 3) When the buttons are continuously pressed:

Each display changes continuously, in the order noted above.

#### 4. If this timer is programmed only for the power-on time (the time when the connected equipment is turned on), the power will be automatically turned off one hour after the power is turned on.

### How to set to the correct day and time

(Follow steps in numbered order.)

Indications of days on this unit are English abbreviations. Time is displayed according to the 24-hour system [from 0:00 (12 midnight) to 23:59 (11:59 P.M.)].

#### 2 Set to today:

- To "MON" if today is Monday
- To "TUE" if today is Tuesday
- To "WED" if today is Wednesday
- To "THU" if today is Thursday
- To "FRI" if today is Friday
- To "SAT" if today is Saturday
- To "SUN" if today is Sunday

#### 1 "time set"

#### 3 Set to one minute later than the present time.

Set the minutes.

Set the hour.

Example: If the present time is 1:00 P.M. ...

Set the display to **13:01**

#### 4 At the moment when the present time reaches 1:01 (as shown by a clock, radio tone, etc.), set to the "manual" position.

(The unit will then begin functioning as a clock.)

### Timer setting procedure

(Follow these steps in the numbered order.)

Be sure you've set the correct present day and time, as described on page 5!

#### To turn the power on and off (to connected equipment) once only on a certain day each week. . .

Follow steps ① to ④ at the right.

#### To turn the power on and off once only. . .

(The unit will operate once only as programmed, after which the setting will be cancelled.)

##### Steps

- Set to the "once" position as described in step ① at the right.
- Follow steps ② to ④ at the right.

##### Note:

The day which can be programmed in step ② is one day only from Monday to Sunday.

#### To turn the power on and off twice on a certain day each week. . .

(For example to turn the power to connected equipment on and later off, once in the morning as an alarm, and then to turn the power on and off later the same day before going to bed.)

##### Steps

##### 1. Setting the first on and off times

- Set to the "weekly 1" position as described in step ① at the right.
- Follow steps ② to ④ at the right. (Step ⑦ is unnecessary in this instance.)

##### 2. Setting the second on and off times

- Set to the "weekly 2" position as described in step ① at the right.
- Follow steps ② to ④ at the right.

##### Note:

The day setting made in step ② must be the same day used for the first on-off setting.

#### To turn the power on and off three times in one day (on one day only). . .

##### Steps

##### 1. Setting the first on and off times

- Set to the "once" position as described in step ① at the right.
- Follow steps ② to ④ at the right. (Step ⑦ is unnecessary in this instance.)

##### Note:

The day which can be programmed in step ② is one day only from Monday to Sunday.

##### 2. Setting the second on and off times

- Set to the "weekly 1" position as described in step ① at the right.
- Follow steps ② to ④ at the right. (Step ⑦ is unnecessary in this instance.)

##### Note:

The day setting made in step ② must be the same day used for the first on-off setting.

#### 3. Setting the third on and off times

- Set to the "weekly 2" position as described in step ① at the right.
- Follow steps ② to ④ at the right.

##### Note:

The day setting made in step ② must be the same day used for the first and second on-off settings.

#### To turn the power on and off twice every week (on different days). . .

Follow these steps to program the unit for on-off operation on combinations of days other than those combinations described in the "Note" of step ② at the right (for example, Monday and Tuesday, or Wednesday and Thursday, etc.).

Be sure to program the first day as "weekly 1" and the second day as "weekly 2".

##### 1. Setting the first on and off times

- Set to the "weekly 1" position as described in step ① at the right.
- Follow steps ② to ④ at the right. (Step ⑦ is unnecessary in this instance.)

##### 2. Setting the second on and off times

- Set to the "weekly 2" position as described in step ① at the right.
- Follow steps ② to ④ at the right.

**2 Select the day or days**

- To "MON" if today is Monday
- To "TUE" if today is Tuesday
- To "WED" if today is Wednesday
- To "THU" if today is Thursday
- To "FRI" if today is Friday
- To "SAT" if today is Saturday
- To "SUN" if today is Sunday

**Note:**

The following four combinations of days are also possible. Select the desired combination by pressing the button. (Note that these combinations cannot be used if the power is to be turned on and off only once.)

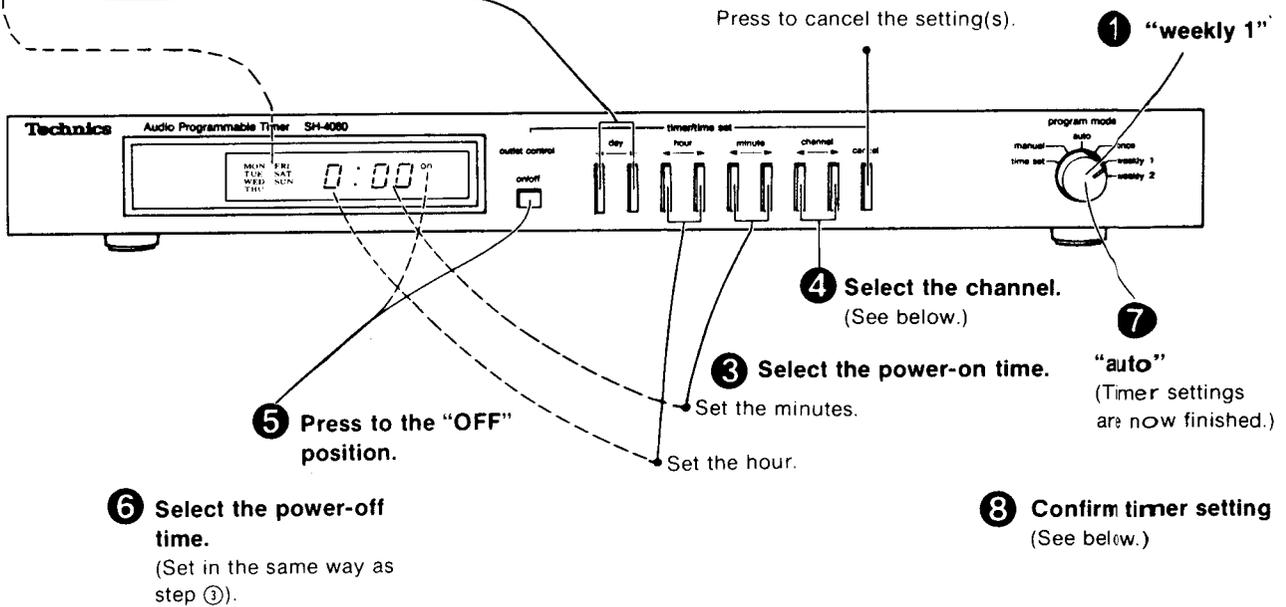

- To turn the power on and off weekly at the same time every day, set to .....
- To turn the power on and off weekly at the same time every day except Sunday, set to .....
- To turn the power on and off weekly at the same time every day except Saturday and Sunday, set to .....
- To turn the power on and off weekly at the same time every Saturday and Sunday only, set to .....

|     |     |
|-----|-----|
| MON | FRI |
| TUE | SAT |
| WED | SUN |

**About selection of the channel...**

If a Technics tuner with the random pre-set memory feature is connected to the control output terminal on the rear panel of this unit, the "channel" to be received when the power comes on can be pre-set.

When the power comes on, the broadcast of the indicated "channel" can be heard.

**To confirm timer setting(s)**

## DISASSEMBLY INSTRUCTIONS

### How to remove the printed circuit board.

1. Remove the 2 setscrews (Fig. 1: ①, ②) of the cabinet.
2. Remove the 1 setscrew (Fig. 1: ③) of the FL Bracket and move the FL bracket in the direction of the arrow A in Fig. 1.
3. Remove the 3 setscrews (Fig. 1: ④ ~ ⑥) of the front panel, and move the front panel in the direction of the arrow B in Fig. 1.
4. Remove the 3 setscrews (Fig. 2: ⑦ ~ ⑨) of the printed circuit board.

(Raise the printed circuit board when repairing.)

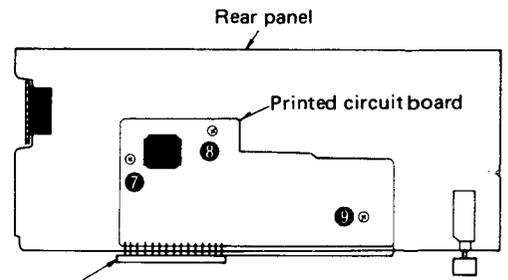

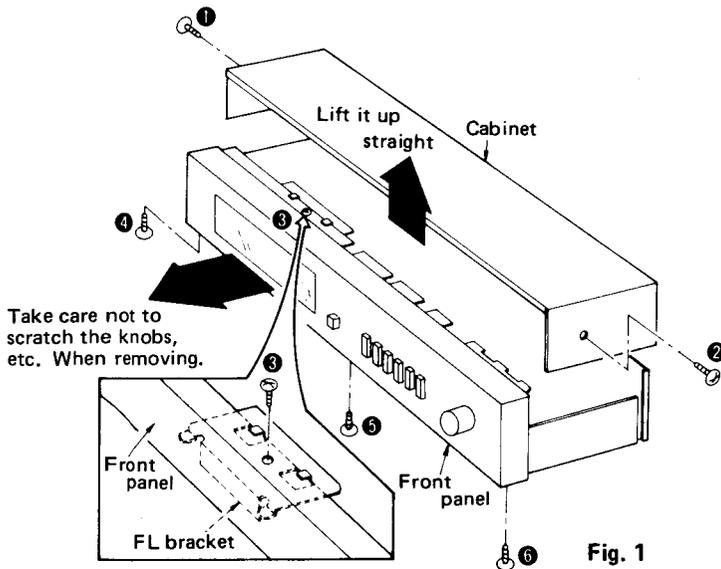

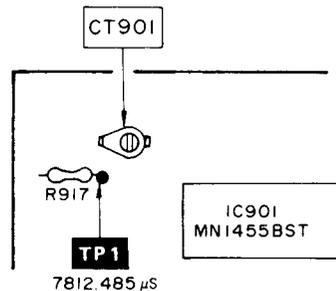

Fig. 2

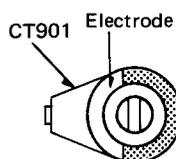

## MEASUREMENTS AND ADJUSTMENTS

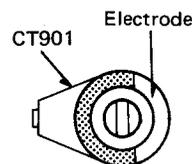

### Oscillation frequency adjustment

Equipment used — Frequency counter (VP-438A or equivalent)

| PARTS ADJUSTED | ADJUSTING PROCEDURE  |
|----------------|--|
| CT901          | <ol style="list-style-type: none"> <li>1. Connect frequency counter to between <b>TP1</b> and ground.</li> <li>2. Adjust CT901 so that the frequency is <math>7812.485 \pm 0.005\mu\text{s}</math> (128.0000 Hz).</li> </ol> <p>Note 1: The clock accuracy depends upon the result of this adjustment. So, the frequency must be correctly adjusted.</p> |

[The capacity is maximum at this position. (Time delays.)]

[The capacity is minimum at this position. (Time advances.)]

# Audio Programmable Timer SH-4060 / SH-4060(K)

# ■ REPLACEMENT PARTS LIST

- Notes:**
- Part numbers are indicated on most mechanical parts. Please use this part number for parts order.
  - Important safety notice: Components identified by  $\Delta$  mark have special characteristics important for safety. When replacing any of these components use only manufacturer's specified parts.
  - Bracketed indications in Ref. No. columns specify the area. Parts without these indications can be used for all areas.
  - The "S" mark is service standard parts and may differ from production parts.
  - The parenthesized numbers in the columns of description stand for the quantity per set.

## CIRCUIT BOARDS AND WIRING CONNECTION DIAGRAM

### REPLACEMENT PARTS LIST

- Notes:**
- Part numbers are indicated on most mechanical parts. Please use this part number for parts order.
  - Important safety notice: Components identified by  $\Delta$  mark have special characteristics important for safety. When replacing any of these components use only manufacturer's specified parts.
  - Bracketed indications in Ref. No. columns specify the area. Parts without these indications can be used for all areas.
  - The "S" mark is service standard parts and may differ from production parts.

- Unless otherwise specified. All resistors are in OHMS ( $\Omega$ ), K = 1000 $\Omega$ , M = 1000k $\Omega$ . All capacitors are in MICROFARADS ( $\mu$ F), P =  $\mu$ F.

#### Areas

- [DX] is available in Scandinavia.
- [EG] is available in F.R. Germany.
- [DM] is available in Denmark.
- [EK] is available in United Kingdom.
- [EW] is available in Switzerland.
- [EF] is available in France.
- [XA] is available in Southeast Asia, Oceania, Africa, Middle Near East and Central South America.
- [EH] is available in Holland.
- [EB] is available in Belgium.
- [Ei] is available in Italy.

#### Numbering System of Resistor

Example  
 $\frac{ERD}{Type} \frac{25}{Wattage} \frac{T}{Shape} \frac{J}{Tolerance} \frac{104}{Value}$

| Resistor Type     | Wattage             | Tolerance     |
|-------------------|---------------------|---------------|
| ERD : Carbon      | 25 : 1/4W           | J : $\pm 5\%$ |
| ERG : Metal Oxide | 50 : 1/2W<br>2 : 2W |               |

#### Numbering System of Capacitor

Example  
 $\frac{ECKD}{Type} \frac{1H}{Voltage} \frac{103}{Value} \frac{Z}{Tolerance} \frac{F}{Peculiarity}$   
 $\frac{ECEA}{Type} \frac{1E}{Voltage} \frac{S}{Peculiarity use} \frac{101}{Value}$

| Capacitor Type      | Voltage     | Peculiarity    |
|---------------------|-------------|----------------|
| ECEA : Electrolytic | 0J : 6.3V   | Z : +80%, -20% |
| ECKD : Ceramic      | 1A : 10V    | K : $\pm 10\%$ |
| ECCD : Ceramic      | 1V : 35V    | P : +100%, -0% |
|                     | 50 : 50V    |                |
|                     | 1H : 50V    |                |
|                     | KC : 400VAC |                |

|              |                 |  |  | 42           | X1              |   |  |

**SCHEMATIC DIAGRAM**

(This schematic diagram may be modified at any time with the development of new technology.)

\* The part No. of transistors, IC and diodes mentioned in the schematic diagram stand for production part No. Regarding the part No. without  $\odot$  mark, the production part No. are different from the replacement part No. Therefore, when placing an order for replacement parts, please use the part No. in the replacement parts list.

**Notes:**

- 1. **S1** : Voltage selector switch in "220V" position. (110V  $\leftrightarrow$  120V  $\leftrightarrow$  220V  $\leftrightarrow$  240V)
- 2. **S901** : AC outlet control switch. on  $\leftrightarrow$  off
- 3. **S902** : Day selector switch. . . . . (down)
- 4. **S903** : Day selector switch. . . . . (up)
- 5. **S904** : Hour selector switch. . . . . (down)
- 6. **S905** : Hour selector switch. . . . . (up)
- 7. **S906** : Minute selector switch. . . . . (down)

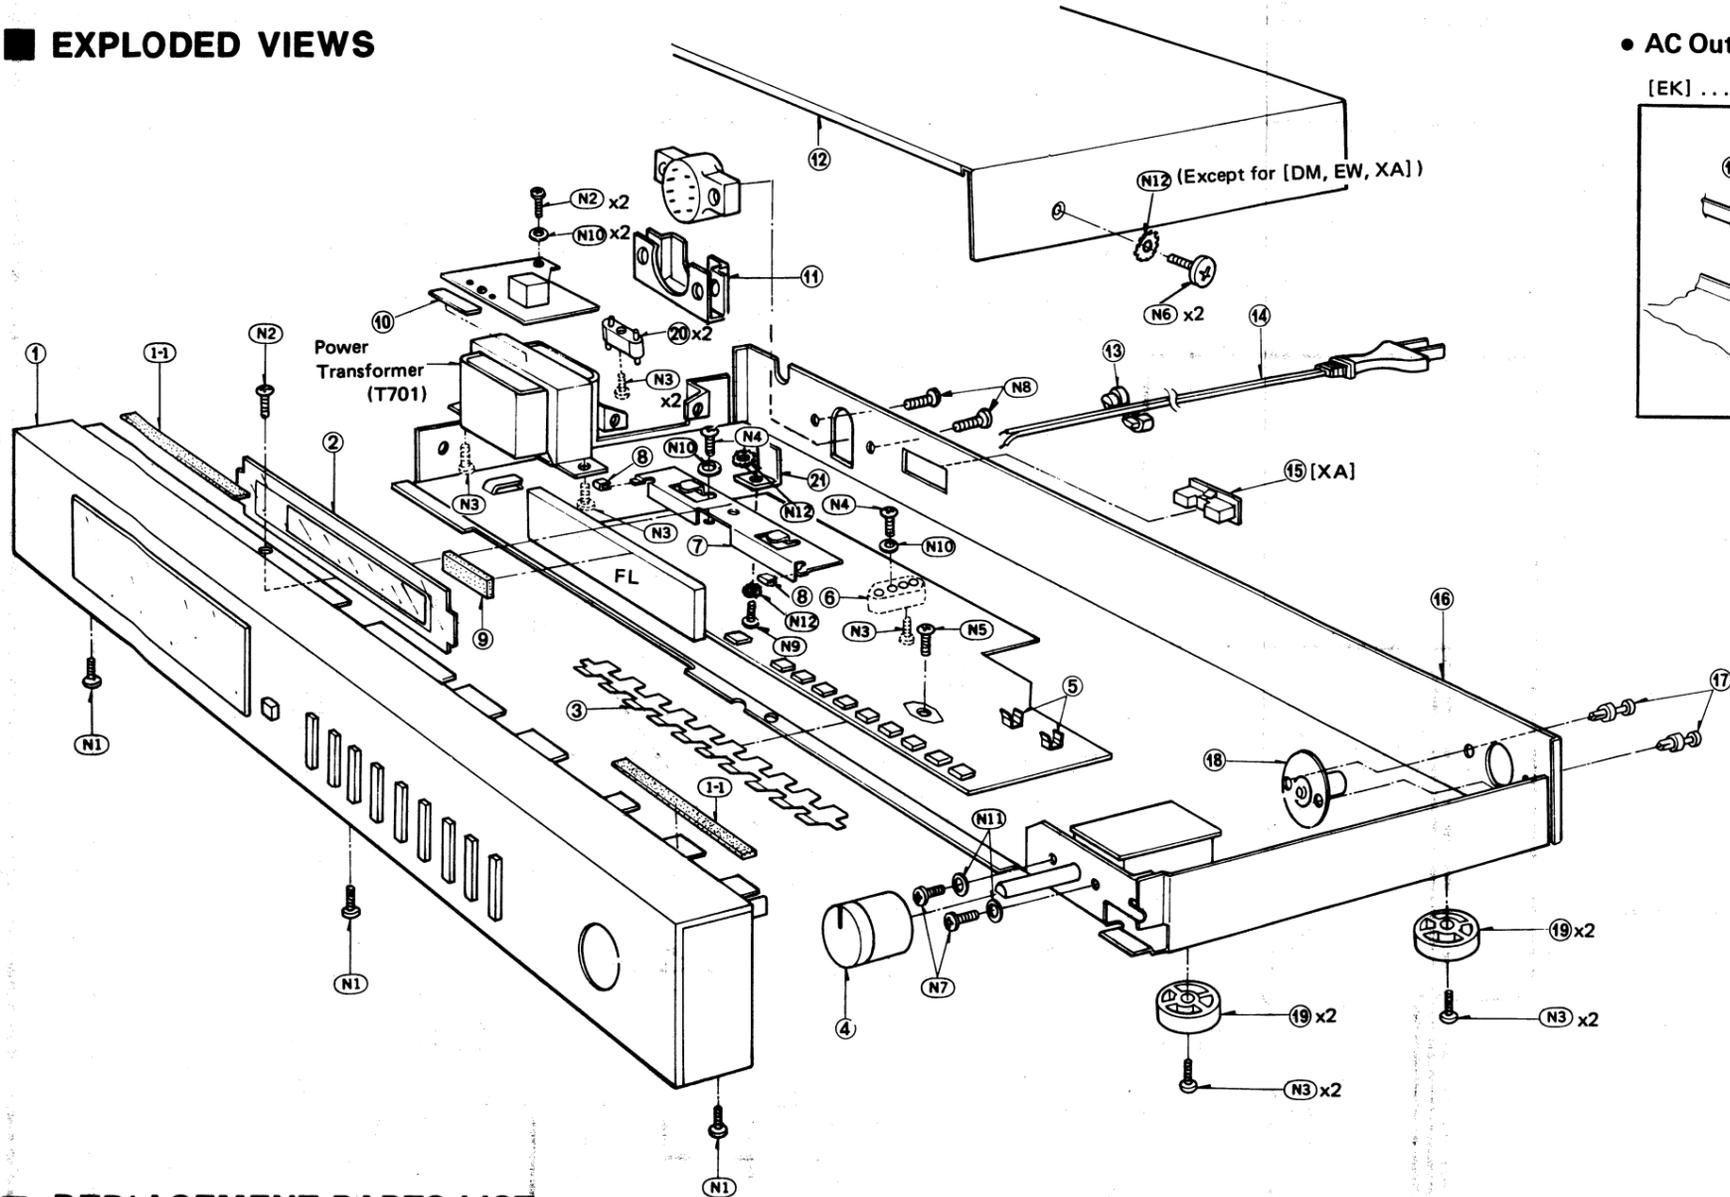

- 8. **S907** : Minute selector switch. . . . . (up)
- 9. **S908** : Preset channel selector switch. . . . . (down)
- 10. **S909** : Preset channel selector switch. . . . . (up)
- 11. **S910** : Cancel (timer) switch.
- 12. **S911** : Program mode selector switch.
  - ① time set    ② manual    ③ auto
  - ④ once       ⑤ weekly 1    ⑥ weekly 2
- 13. **RLY1** : Relay in "off (normal open)" position.

- 14.  $\square$  indicated voltage values are the standard values for the DC electronic circuit tester (high impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.
- 15. The value in ( ) stands for DC voltage during timer operation.
- 16.  $\text{---}$  Positive (+B) lines     $\text{---}$  Negative (-B) lines

17. Important safety notice: Components identified by  $\blacktriangle$  mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.

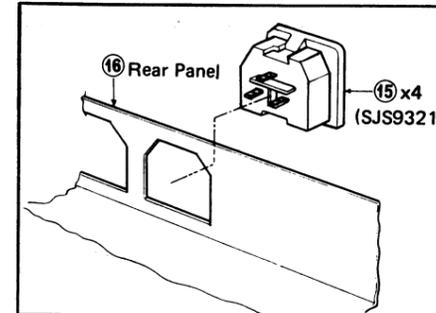

# SH-4060 SH-4060

## EXPLODED VIEWS

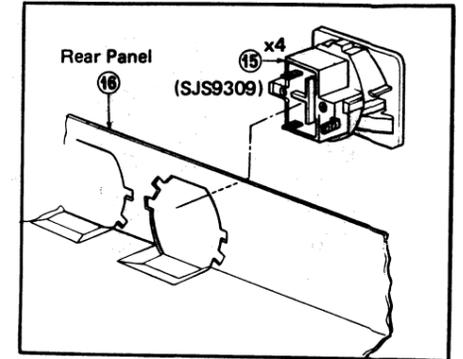

### AC Outlet and Rear Panel

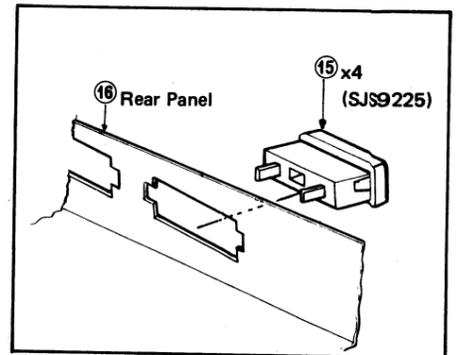

[EK] . . . . . For United Kingdom.

[DX, EB, EF, EH, Ei, EG] . . . . . Except for United Kingdom, Denmark and Switzerland.

[DM, EW] . . . . . For Denmark and Switzerland.

- Areas**
- \* [DX] is available in Scandinavia.
  - \* [EG] is available in F.R. Germany.
  - \* [DM] is available in Denmark.
  - \* [EK] is available in United Kingdom.
  - \* [EW] is available in Switzerland.
  - \* [EF] is available in France.
  - \* [XA] is available in Southeast Asia, Oceania, Africa, Middle East and Central South America.
  - \* [EH] is available in Holland.
  - \* [EB] is available in Belgium.
  - \* [Ei] is available in Italy.

## REPLACEMENT PARTS LIST

### ..... Cabinet & Chassis Parts

- Notes:**
- Part numbers are indicated on most mechanical parts. Please use this part number for parts orders.
  - Important safety Notice: Components identified by  $\Delta$  mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.
  - $\square$ -marked parts are used for black only, while  $\circ$ -marked parts are for silver type only.
  - Parts other than  $\square$  and  $\circ$  marked are used for both black and silver types.
  - Bracketed indications in Ref. No. columns specify the area. Parts without these indications can be used for all areas.
  - The "S" mark is service standard parts and may differ from production parts.
  - The parenthesized numbers in the columns of description stand for the quantity per set.
